I am a student of BCA at Indus University and I am in my fifth semester. As an intern, I worked for a company called Ekaantik as a Web developer engineer. It was my pleasure to work on Flutter, to design login pages and to provide him with many other features that were useful to him, for which I received a letter of appreciation. In addition, he served as a member of the Student Active Cell Committee (SAC). Although I am a fresher, I promise to do my best to contribute to the growth and welfare of this great organization as much as I can.

Experience

DESKTOP SUPPORT ENGINEER, TEAM COMPUTERS PVT.LTD   *16 -06-2021 TO 04-12-2021*

- I am maintaining a computer system. I troubleshoot issues, install and update software, and ensure the security of our systems. I also perform regular maintenance, such as backing up data and clearing cache files. I also use anti-virus and anti-malware tools to scan our system for potential threats. I also monitor the system closely for any suspicious activity. Finally, I ensure that all of the system's components are functioning properly.

FRONTEND ENGINEER, EKAANTIK SOFTWARE SOLUTIONS PVT. LTD   *01-06-2023 TO 31-06-2023*

- Worked as an intern. We develop an application that connects one person to another using phone numbers and work on the front-end of the application. We work on creating an intuitive user interface and testing the application for bugs. We also assist with creating promotional materials and providing customer service.
- The internship offers the opportunity to gain valuable hands-on experience in a real-world setting. Interns will also gain valuable insight into the development process and the opportunity to network with experienced professionals.
- • Flutter
- • Docker
- • Github

HACKATHON SSIP, HACKATHON.

THE PROBLEM VAHICLE SHARE SYSTEAM. SO HERE WE AN APPLCITON CALLED GOTOGETHER.

- Therefore, it would be beneficial if the Go Together application provided a carpool feature. A person can use the Go Together application to go to work and at the same time another person is also interested in traveling to the same place. • At that time, they can travel together, but only one of them is willing to use her vehicle. As a result of this, they save money and have fewer vehicles on the road, which reduces traffic jams and they gain many benefits. • The Passenger employee can accept to be a part of the carpooling group and avail the services via AN OTP. The Passenger employee can reject the services
- TECHNOLOGY USED :
- FLUTTER
- FIREBASE
- VS CODE
- GOOGLE MAP API

- **SAC(STUDENT ACTIVITY CELL)**
  - The Student Activities Cell (SAC) is a college committee which consists of the best students of the college and is responsible for organizing all of the college events. The SAC is also responsible for promoting student engagement and improving the student experience. They strive to create a vibrant and engaging college environment for all students. The SAC also represents the voice of the students and helps the college ensure that they are meeting the needs of the students.
  - **Production Head(2022-2023)**
  - As Production Head, I am responsible for managing all financial activities of the event and collecting the necessary resources. It is my responsibility to ensure that the event is within budget and that all resources are utilized effectively. Moreover, I will be responsible for organizing and managing the event's staff.
